

you can **RELY** on

**WATERPROOFING &  
CORROSION-RESISTING  
ADMIXTURE**

## SPECIFICATION FOR

# AQUAPEL\*

### REQUIREMENT:

Integral water-proofing and damp-proofing for concrete, renders & toppings, etc.  
Control of water absorption and dampness transmission by capillary action.  
Enhance durability and resistance to corrosion/corrosive environments  
(For Heavy & Extra Heavy Duty applications see Cementaid "3CC" & "Caltite").

### PRODUCT TO USE:

#### AQUAPEL

Hydrophobic Pore-blocking Ingredient (HPI)

### HOW TO SPECIFY:

"All concrete (specify sections) shall incorporate Cementaid **AQUAPEL** at the rate of 1 litre per 40 kg bag of cement used (or 8 litres per cubic metre of concrete), or at other rates recommended by the manufacturer with water content adjusted to maintain slump".

For optimum basic density, the minimum cement content for concrete mixes should be 335 Kg. per cubic metre. However **AQUAPEL** is effective in a wide range of cement content mixes, in accordance with users preference. For best results, the [water + **AQUAPEL**]: cement ratio should not exceed 0.45. A superplastomiser may be used for higher workability/placement slump.

### RENDERS & TOPPINGS:

"All renders and/or toppings (specify sections and mix) shall incorporate Cementaid **AQUAPEL** at the rate of up to 1500 ml. per 40 Kg bag of cement used, with water content adjusted to maintain slump."

### EFFECTS:

Reduces water absorption and transpiration of moisture by 70-80%, compared to normal concrete. Typical test absorption (BS 1881:Pt.122:1983) <1.5%, vs. similar plain concrete ~4%.  
Gives a slight increase in workability.

### WHERE RECOMMENDED:

All general-purpose concrete floors or substructures in contact with damp or wet ground, marine or acidic environments, etc. Water-resistant screeds and renders etc. on bathrooms, showers, exteriors etc.  
(For Heavy & Extra Heavy Duty applications see Cementaid "3CC" & "CALTITE").

### NOTE:

**AQUAPEL** can be detected in wet concrete by the slight odour of ammonia present. Allow good ventilation during works, particularly if sensitised.

### APPLICATION: CONTACT CEMENTAID FOR SUPPLY AND APPLICATION SERVICE

INDUSTRIAL FLOOR SPECIFICATIONS • CONCRETE WATERPROOFING & CORROSION-PROOFING ADMIXTURES  
OIL & SOLVENT PROOFING • SURFACE TOUGHENING & DUSTPROOFING • ANTI-CORROSION IMPREGNATIONS  
RAPID HARDENING • RETARDING • GEL CONTROL AGENT • MORTAR AND DAMPCOURSE ADMIXTURES, etc.

The information and recommendations herein are, as a result of experience and testing, accurate to the best of the seller's knowledge. However, as the proposed use and the circumstances surrounding such use are not known to the seller, it does not guarantee or warrant the product's suitability in any particular instance and shall not be liable for any loss or damage consequent upon any use whatsoever unless the seller has otherwise stipulated the product's suitability for a particular use in writing signed by a Director of the seller.
