SPECIFICATION FOR

MORTAR DAMP-PROOFING ADMIXTURE (BLACK)

CALBLACK*

REQUIREMENT:

Damp-proofing for brick mortar (black colour)

PRODUCT TO USE:

Cementaid CALBLACK

HOW TO SPECIFY:

“All mortar (specify damp-proof course) shall be integrally waterproofed by the addition of Cementaid Calblack Dampcourse Admixture”.

The mix shall consist of 1 part fresh Portland Cement to 2 parts sand mixed with water and containing Cementaid Calblack at the rate of one (1) litre per 40Kg bag of cement. **DO NOT USE LIME.**

“The dampcourse must finish with a minimum of 12mm thickness, throughout, or alternatively lay the Calblack mortar for two (2) consecutive horizontal courses with perpendiculars between. Trim and rod joints to a smooth, dense finish”.

EFFECTS:

Produces a dense, black mortar, permanently proofed against rising damp, protection which outlasts the life of normal brickwork.

WHERE RECOMMENDED:

All masonry construction at ground level.

PACKAGING:

205 Litre, 20 Litre, 5 Litre, 1 Litre

NOTE:

STIR WELL BEFORE USE

CALBLACK Dampcourse is not a mortar colourant, and will fade with UV exposure over time. To minimise UV exposure, coloured mortars should be struck back from the brick surface and/or rodded hard to bring cement to the surface.
